

You are invited to Participate in the Pursuit of Our Common Goal:

“To protect lives and property from fire through the widespread acceptance of the fire sprinkler concept. *—NFSA Mission Statement*

Serving the fire sprinkler industry since 1905, NFSA is a trade association whose objectives are to:

- Promote, defend, enhance, and improve the business of manufacturing and installing fire sprinkler devices and systems;
- Foster and promote the recognition of fire sprinkler industry as a unique identity in itself;
- Conduct such programs and projects as are in keeping with these objectives, including, but not limited to:

Engineering	Public Relations	Building and Fire Codes
Seminars and Workshops	Exhibitions	Legislation
Federal Liaison	Technician Training	Project Management
Insurance	Field Programs	Publications

Contractor Membership is open to any firm or corporation which installs, inspects, maintains or repairs fire sprinkler systems in the United States. Organizations performing these functions outside of the United States may join NFSA as International Contractor's. Contact NFSA's Membership and Public Relations Department at (845) 878-4200, Fax: (845) 878-4215, or email to membership@nfsa.org for further information.

Benefits:

- Contractor Members receive NFSA's informative four-color magazine, *Sprinkler Quarterly*. You will also receive NFSA's newsletters, "*Sprinkler TechNotes*", "*Code Watch*" and "*GrassRoots*".
- Contractor Members are eligible for discounts on publications from NFSA's comprehensive Resource Center, seminar registration fees and training modules from the NFSA Academy, the fire sprinkler industry's largest on-line distance learning library.
- Being an NFSA member also ensures early notification of important educational programs and industry developments through frequent electronic *e-Alert* bulletins.
- You will have access to NFSA's professional staff, both at the National Headquarters and through regional offices throughout the country. Through its "Engineer of the Day" program the Association provides contractor members with time and money saving technical assistance to overcome today's challenges.
- NFSA serves as a code and legislative liaison and industry "watchdog". As such, NFSA provides contractor members with many opportunities for direct input into the fire sprinkler industry, locally and at the national level.
- Contractor members are entitled to have an unlimited number of branch offices listed on the NFSA database to receive membership benefits – even individuals at the same location.

Contractors Council: Elected by and from NFSA Contractor Members in good standing from every region of the country, the Contractor's Council has purview over those affairs germane to the contracting interests of the industry, including but not limited to installation standards, building codes, legislation, and other functions consistent with the goals and objectives of NFSA.

NFSA Chapters: Contractors participate locally in groups established throughout the country. Most meet on a regular basis to share concerns and hear industry speakers. Some even host annual regional seminars similar in format to the national convention providing excellent networking opportunities.

National Committees: Contractor member representatives participate on several national committees, which include the NFSA Engineering & Standards (E & S) Committee to address technical and other issues affecting the fire sprinkler community. Much of the positive change that takes place in the sprinkler installation standards can be attributed to input from NFSA's E & S Committee.

Contractor Membership Application

Annual Payment Schedule
